We are committed to providing quality in everything we do, and proud to offer the most luxurious linens that are ethically made and affordable.

**Oeko-Tex® Made in Green**

Oeko-Tex Made in Green certification means the materials we use are tested and certified to have no harmful substances. Our linens are made in an environmentally friendly facility, practicing social responsibility in the workplace.

**GOTS**

GOTS certified is the leading standard for textiles made from organic fibers. Bamboo is grown organically so this certification does not apply to the 100% bamboo items that we make, but does apply to the cotton used in our bamboo cotton blends for Towels and Sheets.

**Green America**

The Green America certification assures that our company is dedicated to creating products that are green, healthy, ethically produced, and with organically grown textiles.

**Fair Trade Certified**

Fair Trade Certified, we are dedicated to environmentally sustainable practices, and safe working conditions for those that produce our linens. Fair wages, fair hours and safe working environments are important to us as we not only want to supply eco-friendly linens, but also ensure that our linens are produced in mills that care about the safety of their workers.

**Panda-Friendly**

Panda-Friendly as no natural panda habitats are disturbed during the growing as we only use bamboo that is grown organically on farms.

**PETA approved Vegan**

PETA approved Vegan 100% plant based and made without harming animals. 100% Bamboo is also known as Vegan Silk.

**SMETA**

SMETA ensures that our workers are not overworked and are fairly paid, and there is no child or slave labor. We have worked with our factory for over 10 years, have personally visited and met with many of the workers, as well as confirmed the clean and safe environment.

**Sustainable**

Sustainable, we limit waste, reuse packing materials, and recycle so that we do our part to produce linens that are environmentally sustainable.
